

VANSHIKA SHARMA

Email: vanshikas7788@gmail.com | +91-8449711788 | [GitHub](#) | [Linkedin](#)

Professional Summary

Full-stack developer skilled in building scalable web applications using the MERN stack (MongoDB, Express, React, Node.js). Experienced in developing secure authentication systems, RESTful APIs, and asynchronous backend workflows. Proficient in Docker-based containerization and CI/CD pipelines using GitHub Actions for automated deployment. Passionate about building efficient, production-ready applications with a strong focus on performance, clean architecture, and user experience.

Skills & Coursework

Programming languages: C, Java

Backend & Databases: Node.js, Express.js, MongoDB

Tools & Platforms: Git, GitHub, Docker, Postman

Frontend: Html, CSS, JavaScript, React.js

CSS Frameworks: Bootstrap, Tailwind CSS

Data Structures & Algorithms | Design & Analysis of Algorithms | Object Oriented Programming | Operating System | Database Management System | Computer Networks | JWT Authentication | REST APIs | Asynchronous Processing

Project

Project 1 - Property Listing Web Application

[\(GitHub\)](#) [\(Live Demo\)](#)

- Developed a full-stack web application to create, manage, and browse property listings
- Implemented user authentication (signup/login) and secure session handling
- Built RESTful APIs using Node.js and Express.js with MongoDB integration
- Enabled image uploads and dynamic rendering using EJS templates
- Integrated interactive maps using Leaflet for location visualization
- Designed responsive UI for seamless user experience across devices

Project 2 - TaskForge – AI Task Processing Platform

[\(GitHub\)](#) [\(Live Demo\)](#)

- Developed a full-stack web app for creating and managing asynchronous AI-like tasks with real-time status tracking.
- Implemented secure **JWT authentication** with OTP-based password reset and bcrypt encryption.
- Built RESTful APIs using **Node.js, Express, and MongoDB** for full CRUD operations on tasks.
- Designed asynchronous task execution system with background processing (pending → running → success/failure).
- Created responsive UI using **React (Vite) and Tailwind CSS** for smooth user experience.
- Containerized application using **Docker** and implemented **CI/CD pipeline with GitHub Actions** for automated deployment.
- Deployed live full-stack application on **Render** with frontend and backend integration.

Education

Meerut Institute Of Engineering And Technology, Meerut(UP)

2023 - 2027

- *Branch: CSE | CGPA: 7.5*

The S.D. Public School, India

- *CBSE (Class XII) – 82%*

2023

Certifications

- **MongoDB Certification- Mongo Db Atlas**
- **Figma UI/UX design Workshop.**
